- 2009 [Measuring the Performance of Islamic Banks by Adapting Conventional Ratios](#). German University in Cairo Faculty of Management Technology Working Paper Series No. 16
Published as an article in [Opalesque Islamic Finance Intelligence](#)

Current projects

- ongoing Asset pricing for multiple segmented markets.
With B. Nietert.
In this research we attempt to expand the current segment markets asset pricing theory which is limited to one segmentation, to an unlimited number of segmentations. This has clear uses in the current context of investors who have significantly different investment alternatives such as green/ESG investors existing along with Islamic investors, conventional investors and other investors with limitations on short-selling for example.
- Status:
Paper scheduled for presentation in the next IFORS Conference – August 2021
- ongoing Developing an Islamic benchmark
- Islamic banks have yet to come up with an appropriate benchmark upon which to compare the returns on their investment accounts. Up till now, they have used conventional benchmarks, or returns on Sukuk which both do not fit the risk-return characteristics of investment accounts.
- Status:
Paper presented at the 21st IFORS Conference and the 29th Society for the Advancement of Socio-Economics (SASE).
Currently preparing for journal submission
- ongoing An analysis of intersectoral FDI flows with a focus on MENA countries.
With S. Hassan.
- In this research we revisit intersectoral FDI flows into countries, an area that has not been studied yet in the context of the Middle East and North Africa.
- Status:
Work in progress.
- 2021 Transparency and investment recommendations for Islamic investment accounts: An empirical analysis. With B. Nietert.
- Status:
Accepted for publication as chapter in “Islamic Finance and Circular Economy: A Handshake of Impact and Value Creation” Eds. S. N. Ali and Z. H. Jumat – Springer-Nature.
- 2021 The Cost of Constituent-Rebalancing of Shariah-Compliant Indexes - Lessons for the COVID-19 Financial Crisis.
- Status:
Submitted to the ISRA International Journal of Islamic Finance

2021 Empirical Analysis of the Risklessness of Islamic Investment Accounts

Status:

Accepted for publication in Islamic Economics & Finance Letters

2021 The Economic Cost of Ethnic and Religious Discrimination in The Russian Labor Market: A Correspondence Audit. With M. Shakhbazov

Status:

Revision submitted to Problems of Post-Communism
