

Social Protection and COVID-19

Inclusive Responses for
International Migrants and
Forcibly Displaced Persons in the
MENA region

Structure

1. Context
2. Introduction
3. Methodology
4. Overview of Inclusive Social Protection Responses
 - 4.1. Access to Social Assistance
 - 4.2. Access to Health & Social Insurance
 - 4.3. Access to Labour Market
5. Summary of good practices
6. Conclusions and recommendations

1. Context: socio-economic effects of COVID-19

GDP contraction

- Estimated contraction of **5.2%** of the economic growth in 2020 in the MENA region

Loss of employment

- Arab States suffered a loss of **10.3%** of the hours worked compared to the last pre-crisis quarter (= 6 million full-time jobs).

Increase of poverty

- Estimations show that the pandemic will push a further **8.3 million** people into poverty in the region.

Further aggravated vulnerabilities

- **Migrant workers** comprise a large share of some of the sectors most affected by the economic downturn.
- They usually occupy precarious, informal and low-paid jobs with less access to SP and health insurance.
- Further aggravated the humanitarian situation of **forcibly displaced populations**.

The limited access to SP systems and current social policy responses has greatly reduced non-nationals' ability to cope with the negative socioeconomic effects of the pandemic.

2. Introduction

Goal and Scope

Identify good practices of social protection responses to COVID-19 in the MENA region that included migrant workers and their families, as well as forcibly displaced populations.

The article documents governmental and humanitarian practices of inclusive social protection responses, including social assistance, social insurance and labour market policies.

Definition of SP

Set of policies and programmes aimed at preventing or protecting all people against poverty, vulnerability, and social exclusion throughout their lifecycles, with a particular emphasis towards vulnerable groups (ISPA 2014). The following components were considered in the article:

Social Assistance

Social Insurance

Labour Market Measures

3. Methodology

Desk review and data analyses, mainly drawing on:

Social protection responses to the COVID-19 crisis in the MENA/Arab States region

Country responses and policy considerations
Regional UN Issue-Based Coalition on Social Protection (IBC-SP)
July 2020

This paper reflects an ongoing initiative of the Regional UN Issue-Based Coalition on Social Protection (IBC-SP). The Group, co-chaired by ILO and UNICEF, was established in June 2020, bringing forward the activities started under the previous Regional UNDG group. The IBC-SP gathers regional experts from ILO, UNICEF, ESCWA, FAO, IOM, UNDP, UNHCR, WHO, UNWRA, WFP and the PCO to share knowledge, think and work together on the development of effective and inclusive social protection systems, including those in the MENA/Arab States region, as a key pathway for reducing vulnerability and building resilience to shocks and stresses, reducing poverty and achieving the SDGs. The mapping was conducted online starting in March 2020 by regional UN agencies under the former Regional UNDG Group and was updated until June 22 by a research team from the International Policy Centre for Inclusive Growth (IPC-IG). Contact details: Luca Paterano lpaterano@ipcig.org; Samman Thapa stthapa@ipcig.org; Charlotte Bro charlotte.bro@ipcig.org

IBC-SP 'Social protection responses to the COVID-19 crisis in the MENA/Arab States region' (2020).

Social protection responses to COVID-19 in the Global South

Welcome to the IPC-IG and partners' 'Social Protection Responses to Covid-19 in the Global South' Online Dashboard. The Dashboard has two tabs:
- Tab 1: 18 indicators analysing the responses across 7 thematic sections
- Tab 2: Summary table of the responses

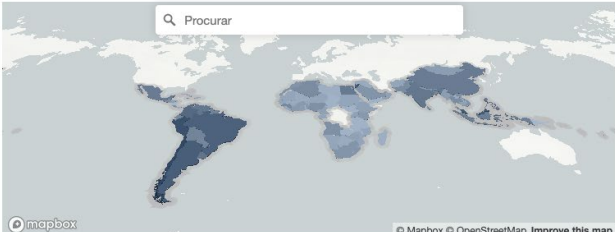

Results can be filtered, for both pages simultaneously, using the options available in the Filters tab located at the top-left of the Dashboard. Notes from the author and/or more information on results can be obtained in icon "?" of each indicator. For more information on ways to navigate the Dashboard, taxonomy and methodology please refer to the Methodological Note or contact dashboard@socialprotection.org.

Overview of responses

Indicator 1. Number of social protection responses to COVID-19

Indicator 2. Main target groups

Notes: Darker tones indicate higher number of social protection responses. On the top-right of the heat map, click on the icon "Drill up" to view the colour gradient at sub-regional level. To reset the map after clicking on a location, click on the ocean areas. See description of more functionalities of the dashboard in the Methodological Note.

Note: A single measure can target multiple groups. Hover over the chart to see the list of programmes for each group.

IPC-IG 'Social protection responses to COVID-19 in the Global South' (2021)

- Information on governmental SP responses.
- Analytical mapping and shock-responsive approach.
- > 1,000 responses mapped in 132 countries, including 20 MENA countries.

COVID-19 RESPONSE OVERVIEW #3

18 August - 14 September 2020

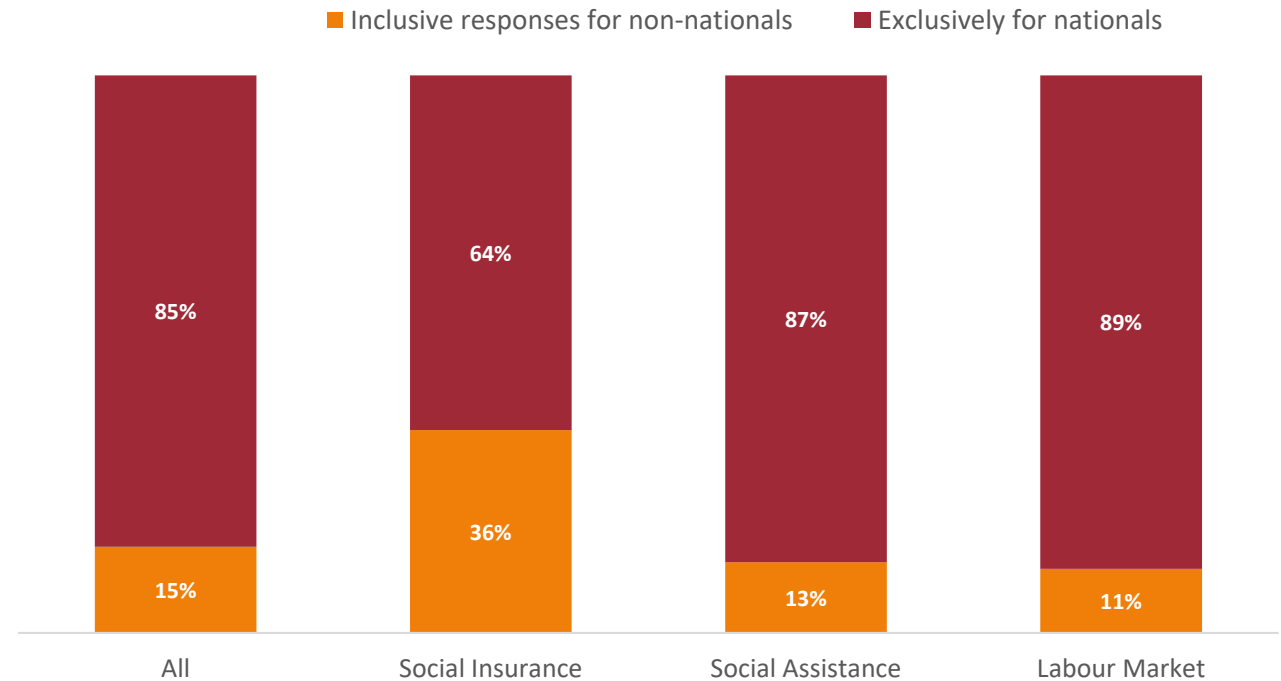

UN periodic reports

- Information on humanitarian SP responses.
- Selected agencies: IOM, UNHCR, WFP and UNICEF.
- Selected countries: Yemen, Syria, Palestine, Iraq, Lebanon, Libya, Sudan

4. Overview of Inclusive Social Protection Responses

- **162** governmental social protection responses in **20 MENA** countries up to March 2021
- Only **15%** (25 of 162) of the government measures mapped guaranteed access to non-nationals
- **Labour market policies were the least common social protection response that included non-nationals** (7 programmes), followed by social insurance (8) and social assistance (10)
- **36** responses led by IOM, UNHCR, WFP and UNICEF in countries facing humanitarian crisis as well as those hosting large forcibly displaced populations

Figure 1. Proportion of governmental response that included some protection to non-nationals

Source: authors' elaboration based on IPC-IG 2021.

Figure 2. Governmental response per country and type

almost half (11) of the migrant-inclusive programmes were mapped in **Jordan**. However, most of the measures in the country were limited to a small sub-set of the non-national population.

Jordan	WS	WS	WS	SSC	WP	UCT	UCT	ECT	UB	UB	UB	11
Kuwait	WS	ECIT	ECIT	3								
UAE	HI	EIT	2									
Qatar	HI	WS	2									
Saudi Arabia	HI	1										
Oman	HI	1										
Bahrain	HI	1										
Sudan	EIT	1										
Libya	EIT	1										
Iraq	UCT	1										
Djibouai	ECT	1										

 Labour Market
 Social Assistance
 Social Insurance

Legend: Social assistance: **ECT** = Emergency Cash transfer; **EIT** = Emergency in-kind transfer; **ECIT** = Emergency cash and in-kind transfer; **UCT** = Unconditional cash transfer; Social insurance: **HI** = Health insurance; **UB** = Unemployment benefit; Labour Market: **WS** = Wage subsidy; **SSC** = lowering/deferring social security contributions; **WP** = waiving/deferring rent/reducing rent/loan/tax payments

Source: authors' elaboration based on IPC-IG 2021.

4.1. Access to Social Assistance

Emergency income support is a good practice to **protect non-nationals** given that large numbers of migrant workers and refugees **were not registered in contributory insurance** given the predominance of **informal work arrangements**.

Country Examples

- **Jordan** Takaful 2 for Daily Wage Workers provided access to Gazan families
- **Djibouti** food vouchers provided by MOSA included refugees in partnership with UNHCR
- **Kuwait** zakat fund provided cash and in-kind assistance for 15,642 undocumented migrant families

Administrative Practices

- **Accepted alternative documents** (e.g. expired passports, work permits, identity cards)
- **Allowed online registration**

4.2. Access to health & Social Insurance

Guaranteeing **healthcare for all, including non-nationals regardless of their migratory status**

Country Examples

Extension of health insurance for migrant workers

- **Saudi Arabia** free tests and free covid treatments irrespective of migratory status

Universal health system and subsidised schemes for refugees

- **Iran** refugees and undocumented ones have access to health care services, free testing and treatment

4.3. Access to Labour Market

Unemployment insurance and other wage subsidy schemes have been extensively used to protect wages and incomes of vulnerable national workers in the MENA region, **the extension of such schemes to non-national workers has been rare and limited**

Country Examples

Unemployment Insurance

- **Jordan** Musaned programmes benefiting both national and non-national insured workers

Labour Market policies

- **Qatar** companies had to pay wages of foreign workers who are in quarantine or undergoing treatment for COVID-19 whether they are entitled to sick leave or not

5. Summary of good practices

	Good Practice	Examples
Responsiveness	Horizontal expansion of existing programmes	Iraq expanded its Social Safety Net programme, including new beneficiaries such as IDP families (IPC-IG, 2021) Djibouti expanded its voucher system programme, including refugee families (IPC-IG, 2021)
	Vertical expansion of existing programmes	WFP Algeria will scale up the number of monthly food rations by 14 per cent to support refugee families who depend on small businesses (Meyer-Seipp 2020).
	Provision of emergency income support through new emergency programmes	Libya's Taraahamo wa Tarahamo programme provided one-off in-kind assistance for families affected by the pandemic, including IDPs (IPC-IG, 2021)
	Guarantee access to healthcare	Qatar and Saudi Arabia provided free testing and treatment for COVID-19 for migrants in the country, including undocumented migrants (IPC-IG, 2021)

5. Summary of good practices

Registration & Targeting	Good Practice	Examples
	Include non-national workers in social insurance system, including for short term risks such as unemployment	Jordan allows non-national workers to contribute to unemployment scheme, and this has allowed to extend wage and income protection to non-national workers during COVID-19, though some elements introduced unequal treatment between Gazan refugees and non-national children of Jordanian mothers and other non-nationals
	Alternative and simplified methods to identify beneficiaries, accepting undocumented migrants	Kuwait offered emergency cash and in-kind benefits through its Zakat House to undocumented migrant households (IPC-IG, 2021).
	Working with the waiting lists and existing databases	UNICEF Jordan's Hajati database allowed rapid inclusion of 21,000 refugee households in WFP and UNICEF-led programmes (WFP, 2020a; Hoop et al., 2020).
	Creating coordination groups	UNHCR Egypt developed a mapping tool for agencies and partners (Hoop et al. 2020). In Kuwait , the Ministry of Social Affairs along with the House of Zakat coordinated with 30 other NGOs through the 'Fazaa Al-Kuwait' campaign to provide beneficiaries, including migrants in irregular situations, with assistance.
	Distributing benefits in advance	WFP in Jordan delivered existing financial and food aid ahead of the usual schedule (Elmasri 2020) and implemented an extended staggered reload schedule for food assistance in camps (WFP 2020).
	Expanding the ATM networks, scheduling payments on different days, providing home delivery and mobile teams	In Jordan , a new joint initiative of Jordan Ahli Bank and WFP enhanced the number of ATMs available to refugees receiving cash assistance. For refugees living in locked-down areas, WFP provided their monthly assistance through the Cash on Wheel ATM service of Cairo Amman Bank (UNHCR 2020c). UNHCR Algeria provided cash assistance to 550 persons of concern from March to June 2020 using home delivery and mobile distribution teams (UNHCR 2020g).
	Provide digital payment modalities	WFP and UNHCR Iraq introduced digital payments for refugees in camps (IPC-IG, 2021). The Central Bank of Jordan created specific permissions to recognise refugee IDs issued by UNHCR to enable them to open mobile wallets and receive assistance (IPC-IG, 2021).

5. Summary of good practices

Communication and community engagement	Good Practice	Examples
	Guarantee community engagement	<p>UNDP Sudan has established more than 150 local networks, including management committees, peace committees, volunteer groups, and farming and water management groups (UNDP 2020).</p> <p>UNHCR Egypt trained volunteers and community leaders to deliver psychological first aid and non-specialised psychosocial support, as a rise in anxiety and depression amongst refugees has been observed (UNHCR 2020f).</p>
Dissemination of quality information using multiple platforms and different languages	<p>UNHCR Sudan successfully reached most refugees using multilanguage SMS, billboards, posters, and community networks (UNHCR 2020d).</p> <p>UNHCR Syria mobilised 250 health volunteers to support COVID-19 awareness-raising campaigns (UNHCR, 2020l).</p>	

6. Conclusions and recommendations

Conclusions

- Few governmental responses to COVID-19 explicitly covered and addressed the needs of non-nationals.
- SP responses reproduced pre-existing exclusion from national social protection systems and further aggravated the vulnerabilities of migrant workers and forcibly displaced populations in the region.
- The level of protection offered to non-nationals has depended greatly on the extent to which they were already accessing social protection systems before the crisis.
- Emergency expansionary SP measures introduced by most countries can be a springboard to accelerate reforms and set foundations for stronger national systems.

Recommendations

- **Inclusive social assistance:**
 - Review national legislation adopting a human rights-based approach, including the principle of non-discrimination.
 - Improve the nexus between humanitarian and development actors to build stronger national social assistance schemes.
 - Built upon the inclusive responses to the pandemic to ensure that inclusion of non-nationals becomes a cornerstone of national SP and health systems.
- **Inclusive social insurance, labour market and healthcare:**
 - Guarantee equal treatment in social security coverage and entitlements, and the maintenance and portability of social security rights.
 - Consider the importance of extending coverage to informal workers and facilitating access of migrant workers to the formal labour market.
 - Seek universal healthcare systems.
- **Improve shock-responsiveness:**
 - Set up inclusive social registries, or strengthen existing ones, including extending social registries for refugees.
 - Easing identification requirements and considering their contribution to exclusion errors

Thank you!
