DIGITALIZATION AND **DISRUPTIVE TECHNOLOGIES** IN MIDDLE EAST NORTH AFRICA (MENA) AND SUB-SAHARAN AFRICA (SSA) REGIONS

Ahmed Farouk Ghoneim

The Repo

revolves around the theme of digitalization and DTs in the two regions (SSA and MENA).

simply answers what are the determinants of adopting digitalization and what are the effects of adopting digitalization in the two regions.

is a synthesis report based on some specific country and regional studies.

Definition and scope of digitalization used in the papers

- No unified definition used.
- Some used very narrow definition and some adopted a broad one.
- They used digitalization proxies depending on data availability and the nature of the sector studied

What is digitalization ?

Determinants of adopting new technologies (readiness)

Human Capital

Both regions, to different extents, lack the human skills needed to allow them to reap the benefits of digitalization.

□ Gender

No clear cut answer was provided regarding the role of gender as determinant.

Determinants of adopting new technologies (readiness)

Status of national data infrastructure

- Modest in both regions
- Includes other aspects as electricity and cyberspace
- Differs within the country itself
- Need to pay attention to differentiate between coverage and usage
- Business models and innovation

Network Readiness Index Overall Scores for 2022 in Selected Countries in MENA and SSA Regions in an ascending order

Institutional and regulatory infrastructure

The country studies identified that it plays a role both in MENA and SSA.

Market structure

The country studies identified that it plays a role both in MENA and SSA.

Physical infrastructure and an enabling environment (associated with geography and location)

The country studies identified that it matters a lot.

Firm's characteristics

Younger are more often eager to adopt technology when compared to old ones.

Effects (Implications) On SSA

- Individual country case studies as well as the regional study found that digitalization is likely to have an overall impact on SSA economies, whether in terms of economic growth, creating jobs and employment (for skilled and unskilled), international trade, or sectoral performance.
- There are major differences identified where some of the sectors in different countries might not have benefited as the industrial and financial sectors in Ethiopia, or agriculture sector in Kenya. Moreover, the differentiation in the impact of digitalization based on the skilled/unskilled dichotomy differs by country, sector, and methodology applied

Effects (Implications) On MENA

- Positive as well
- Comparison between MENA and SSA
- Fear of de Melo and Solleder (2022)

Conclusion and Policy Implications (lessons learnt)

- Questioning national strategies
- De Melo and Solleder(2022) versus country case studies
- Dichotomy of macro indicators and micro foundations
- Importance of focusing on servicification
- Expected gains should be treated with caution

Thank you
